DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 04 September 2023 at 05:47 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be predominantly Low across the UK. However, with sunny conditions and light winds becoming established, there is an increasing risk of Moderate pollution to develop in parts of England and maybe Wales.

Tomorrow: Areas of Moderate levels are likely to become more widespread on Tuesday as the south-easterly wind picks up a little, bringing continental pollution.

Outlook: Light winds and sunny conditions will most likely lead to a prolonged period of Moderate air pollution in England and Wales, perhaps reaching High locally in southern England on Thursday or Friday. Air pollution levels remaining mostly Low in northern England, but some localised Moderate patches are possible.
